**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 01 October 2007.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

### **DETAILED ACTION**

The office action is being resent with the corrected status of the claims. Please refer to the previous office action for the PTO-892 form.

#### ***Claim Rejections - 35 USC § 103***

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claims 33-35 and 44-56 are rejected under 35 U.S.C. 103(a) as being unpatentable over Osakabe (6073683).

Osakabe teaches a method of cooling parts (abstract and Col. 8, line 6 to Col. 9, line 2). The apparatus having at least one completely closed chamber with air substantially removed therefrom and having a single quantity of liquid that extends to cover at least one of the areas from which heat is to be taken (Fig. 1B, 13, 3 and 7, also see Col. 2, lines 5-26 and Col. 8, lines 30-42). Each of the at least one completely closed chamber being integrated with the module 2 and a space above the single quantity of liquid and within the completely closed chamber in which pressure within the space is caused to be set a level which will enable the single quantity of liquid to boil at a selected temperatures, said selected temperature being at a level such that the temperature is below a temperature of the areas from which heat is to be taken this being by reason of, as a first step, filling of the completely closed chamber with the single quantity of liquid and then extracting a selected portion of the single quantity of liquid without allowing air to replace the extracted liquid, and passing at a selected cooling temperature, the single quantity of liquid through condensing means to affect, by

Art Unit: 1791

such cooling, condensation of vapor of the single quantity of liquid in the space to return the condensed vapor to the single quantity of liquid by gravity. The member appears to be airtight sealed (Col. 10, lines 37-39).

Osakabe does not teach a mold die, However Osakabe does teach a heat generating unit 2 which the cooling apparatus 1 is attached.

It would have been obvious for one of ordinary skill in the art to recognize the cooling apparatus of Osakabe could be utilized for cooling elements to other heat generating units such as a die mold.

### ***Response to Arguments***

3. Applicant's arguments with respect to claims 33-35 and 44-56 have been considered but are moot in view of the new ground(s) of rejection.

The new reference Osakabe directs to a cooling apparatus that is the same as the claimed method of cooling for the molding die.

### ***Conclusion***

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to EMMANUEL S. LUK whose telephone number is (571)272-1134. The examiner can normally be reached on Monday-Fridays from 9 to 5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Yogendra N. Gupta can be reached on (571) 272-1316. The fax phone
